## **DETAILED ACTION**

The following is a first action on the merits of application serial no. 10/749,209 filed December 30, 2003.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Okamoto et al. (5,012,770). Okamoto et al. discloses a fixing structure of an intake manifold, comprising a boss part integrally formed with a throttle body (19) mounting flange (18) configured to be coupled to an engine block via a locking bolt, said throttle body (19) mounting flange being integrally coupled to an intake manifold (15).

Regarding claim 2, wherein a portion of said engine block contacting with said boss part is a lateral side of a transmission-mounting flange of a rear cylinder block.

Regarding claim 3, wherein said boss part protrudes out 10 at the bottom of said throttle body mounting flange toward said cylinder block.
